

Take Action for Children with Disabilities

- **Look for ways to include children with disabilities in community activities.**
- **Talk to your child about how children with disabilities have the same rights, and should have the same opportunities, as other children.**
- **Support parents of children with disabilities by offering to help in childcare responsibilities.**
- **Help families that include children with disabilities stay together.**
- **If your child has a disability, talk to your local health care provider about whether your child needs rehabilitation or other health care support, as well as where you can access these services.**
- **If your child has a disability, talk to the administrators and teachers at your child's school to find out what special education services are available to support your child and whether specially-trained teachers are on staff to ensure an appropriate, quality education for your child.**
- **Think about how your neighborhood's environment can be made more accessible for children with disabilities.**
